

I like

I wish

I wonder

Honors classes would be included.

Perspectives from the Science Count as a gen ed. (3 hours)

Would there be a way to transfer in courses as a gen ed that we do not offer. (Geology.)

Math requirements were more open ended.

Freshman seminar could be combined with computer literacy.

If the statement allows an upper level that requires the lower course as a prerequisite

if the headings could be the Learning Outcomes

About Meta-majors

Is the culture change of major requiring certain gen ed courses really going to be emphasized

If students cannot prove proficiency in Computer lit - do they have to take Computer Literacy

Math degree sheet check is challenging. What if their gen ed is Calculus.

Where will verbal communication be assessed
Coral

I Like

the appearance of flexibility of General Education Electives

the students have ability to specialize.

Potential to overlap with their major or (minor).

Breadth is more open-ended not required to take Choices in Wellness.

I Wish

For flexibility for students who are transferring out to get the general education courses needed.

We would ^{assess} ~~assess~~ computer proficiency and trust high courses.
^{not} ^{school}

Some gen ed courses could be upper level. (to benefit transfer students)

I Wondered

What counts as an elective?

How will we ensure students will have all 5 learning outcomes

Will students for instance be able to take 4 math gen ed to meet electives.

How will computer literacy be taught.

Will High School Computer Literacy course count?

Can students in education use education courses for gen ed courses.

If the curriculum was organized around the learning outcomes
